DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-16 rejected under 35 U.S.C. 102(e) as being anticipated by Hira et al. (U.S. 5,961,198). Note in figure 30, the light source 1, light guide plate 2 containing small convexes on the back face, polarizing plate 31, transistor array 32, liquid crystal cell array 33, and color filter 35. Figures 18 and 19 show perspective views of the back face of the light guide plate according to various embodiments.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 17, 19, 21, 23, 25 and 27-29 rejected under 35 U.S.C. 103(a) as being unpatentable over Hira et al. (U.S. 5,961,198). Although Hira et al. does not disclose a reflection plate and polarizing plates in the positions as claimed by the applicant, such an arrangement was conventional for reflection type liquid crystal display devices. Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to arrange polarizing plates and a reflection plate as claimed by applicant within the display device of Hira et al. because it would have been conventional to do so.

Response to Arguments

Applicant's arguments with respect to claims 1-17, 19, 21, 23, 25 and 27-29 have been considered but are moot in view of the new ground(s) of rejection.
